Office Action Summary	Examiner	Art Unit				
	Daniel D. Abebe	2626				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence ad	dress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Response to Arguments

Applicant's arguments with respect to the obvious type of double patenting rejection have been considered and the rejection withdrawn. The claims are rejected in view of the new ground(s) of rejection as shown below.

## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 7 is rejected under 35 U.S.C. 101 because

the claimed invention is directed to non-statutory subject matter. The claimed "noise adaptation program" without the embodiment of a tangible computer readable storage medium is non statutory because it doesn't fall within at least on of the four category of statutory subject matter recited in 35 U.S.C. 101.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, and 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gong et al. (6,658,385).

As to claim 6, Gong teaches a noise adaptation method of speech model for adapting a speech model to any environment, comprising the steps of:

Collecting an original speech data under a low noise environment (R);

Training a set of HMM (generating speech model space) from the speech data and thereby generating an original model.

Receiving utterances under noisy environments (T)

Transcribing (extracting speech feature parameter) the noisy utterances;

Clustering the transcribed data into classes;

Inherently selecting the model to be transformed;

Finding a transformation value for transforming the original low noise speech; and

Conducting linear transformation of the original low noise speech model for use under any noisy environment. (Figs.1-2; Col.2, line 45-Col.3, line12).

the purpose of adapting through linear transformation in Gong's teaching is to increase the likelihood of matching the utterance with the model under noisy circumstances.

With regard to where the model is tree structured, the examiner takes an Official Notice that tree structured speech models are a type of speech model well known in the art of speech recognition and would be obvious to one of ordinary skill in the art to use them in Gong's art for the purpose of attaining fast and efficient recognition process. See Robinson (5,983,180).

The corresponding system and program claims of 1 and 7 for performing the method are analogous to claim 6 and therefore rejected by Gong for the foregoing reasons.

## Allowable Subject Matter

Claims 2-5 and 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: claim 2 is allowable because Gong doesn't teach the clustering/classifying process comprising the steps as recited. Claims 3-5 and 8-9 are allowable for depending on claim 2.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Abebe whose telephone number is 571-272-7615. The examiner can normally be reached on monday-friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on 571-272-7843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
